SOFTWARE ENGINEER (ASPIRING) | FULL-STACK | AI-ASSISTED DEVELOPMENT

Self-taught and bootcamp-trained full-stack engineer with experience building and shipping production applications. Strong in cross-functional collaboration, debugging, and delivering user-facing features. Use AI as an engineering partner to accelerate development, iterate quickly, and improve code quality while maintaining strong judgment over correctness and user impact.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Frameworks: Django, React, Node.js, Spring Boot

Tools: Git, PostgreSQL, AWS, Railway, Cloudinary, JIRA, Jenkins, Crashlytics

Concepts: REST APIs, Microservices, Agile Development, Debugging, Full-Stack Architecture

AI: Claude (Sonnet, Haiku), ChatGPT, GitHub Copilot

EXPERIENCE

GYMprogm — Founder & Full-Stack Engineer

Palo Alto, CA • 2026 – Present • gymprogm.org

- Built and deployed an AI-powered full-stack web application for managing personal training clients (program generation, progress tracking, billing, PWA client portal)
- Designed two-sided architecture (trainer dashboard + client portal) with authentication, onboarding flows, and real-time data tracking
- Integrated Claude to generate structured workout programs, analyze blood tests, and produce personalized recommendations; validated all outputs before user delivery
- Used AI as an iterative engineering partner for brainstorming, code generation, debugging, and documentation while maintaining full ownership of architecture
- Implemented automated workflows (cron-based payment reminders, transactional email via Resend, multilingual support across 10 languages)
- Deployed and maintained production system using Django, PostgreSQL, Railway, and Cloudinary

- Onboarded and supported 5+ active users, replacing manual workflows with a centralized product

Amazon — Support Engineer

Seattle, WA • 05/2025 – 07/2025

- Managed iOS/Android release cycles, coordinating testing, validation, and rollout with engineering, QA, and product teams
- Investigated and resolved production issues using logs, monitoring tools, and cross-team collaboration
- Built Crashlytics and log-based dashboards improving visibility into app health and reducing time to detect issues
- Reduced repeat production issues by 35% through root cause analysis and post-release improvements

Adobe — Software Engineer Apprentice

Remote • 02/2025 – 05/2025

- Built full-stack features using React and Django in Agile sprint cycles
- Translated user stories into functional components and user-facing features
- Participated in code reviews, testing, and design discussions to improve code quality and usability
- Delivered 6–8 production-ready features in collaboration with design and product teams

Infosys — Software Engineer

02/2022 – 08/2023

- Developed web applications using Spring Boot, Angular, and SQL for enterprise clients (Anthem Blue Cross, Toyota)
- Delivered 25+ production features across web and mobile platforms
- Resolved production defects and improved system reliability and performance
- Collaborated cross-functionally to deliver stable, production-ready releases

Bella Global Trade — Founder & Product Builder

01/2019 – 01/2021

- Built and operated e-commerce platform using React, Node.js, and MongoDB
- Migrated from Shopify to custom stack, reducing costs ~25% and improving performance ~30%

- Increased conversion rates and revenue through data-driven product and pricing decisions
- Managed full product lifecycle from concept to launch and customer support

ADDITIONAL EXPERIENCE

Amazon — Human Resources Assistant

2017 – 2019

uTest — Tester

2016 – 2019

SBAM Trades — Senior Equity Analyst & Trader

2008 – 2013

ITE Uzbekistan — Project Manager

2006 – 2008

EDUCATION & TRAINING

General Assembly — Software Engineering Immersive (2025)

Per Scholas — Full-Stack Web Development, Valedictorian (2024)

Caltech — Postgraduate Program in Full-Stack Web Development

Google Project Management Certificate (2025)

B.A. Economics — State University of Economics

ADDITIONAL

Currently pursuing NASM Certified Personal Trainer (CPT), informing real-world user needs for fitness product design

Strong collaborator across engineering, product, and design teams; fast learner with high ownership and bias toward building and shipping
